

**National Interagency Coordination Center  
Incident Management Situation Report  
Friday, October 13, 2017 – 0530 MT  
National Preparedness Level 3**

**National Fire Activity**

Initial attack activity: Light (73) new fires  
 New large incidents: 0  
 Large fires contained: 3  
 Uncontained large fires:\*\* 19  
 Area Command teams committed: 0  
 NIMOs committed: 0  
 Type 1 IMTs committed: 5  
 Type 2 IMTs committed: 2

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

**Northern California Area (PL 4)**

New fires: 19  
 New large incidents: 0  
 Uncontained large fires: 14  
 Type 1 IMTs Committed: 4

**Central LNU Complex**, (5 fires). Sonoma Lake Napa Unit, Cal Fire. Cal Fire IMT 1 (Gouvea). One mile north of Santa Rosa, CA. Brush and tall grass. Moderate fire behavior with wind-driven runs, torching and flanking. Numerous structures threatened. Evacuations, road and area closures are in effect.

**Southern LNU Complex**, (3 fires). Sonoma Lake Napa Unit, Cal Fire. Cal Fire IMT 1 (Lawson). One mile east of Napa, CA. Timber, brush and short grass. Active fire behavior with running and flanking. Numerous residences threatened. Evacuations, road and area closures in effect. Reduction in acreage due to more accurate mapping.

**Mendocino Lake Complex**, (2 fires). Mendocino Unit, Cal Fire. Cal Fire IMT 1 (Derum). One mile west of Potter Valley, CA. Active fire behavior with short-range spotting, single tree torching and uphill runs. Numerous residences threatened. Evacuations and road closures are in effect.

**NEU Wind Complex**, (2 fires). Nevada-Yuba-Placer Unit, Cal Fire. Cal Fire IMT 1 (Patterson). Four miles west of Grass Valley, CA. Timber and brush. Moderate fire behavior with creeping and smoldering. Evacuations, road, trail and area closures in effect.

**Cherokee**, Butte Unit, Cal Fire. Three miles north of Oroville, CA. Brush and tall grass. Minimal fire behavior. Structures threatened. Road and area closures in effect.

**Table**, Eldorado NF. Seventeen miles northeast of Pollock Pines, CA. Timber. Moderate fire behavior.

\*\*\* Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

\*\*\*Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

**Predictive Services Discussion:** A cold front will move into the Great Basin and stretch toward the northern Plains. Scattered rain and snow will continue along and west of the Oregon and Washington Cascades, with mainly snow over western Montana, northern Idaho, and eastern Washington. Windy conditions will spread into the Great Basin with northerly winds continuing in the California Central Valley. Offshore flow will also continue along the southern California coast. Windy, dry and warmer weather will spread across the Plains. Mild conditions will remain in the northeast and scattered rain will stretch along the Mid-Atlantic and Southeast coasts.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

## **HYPOTHERMIA**

*Firefighter Health & First Aid*

Hypothermia occurs when your core body temperature falls below normal. It can easily happen in cold winds or wetness. Hypothermia can also occur in moderately cool temperatures, particularly if coupled with dehydration. People tend to forget to drink on cool, wet days and can get hypothermic even when the temperature stays well above freezing.

● Symptoms of hypothermia include:

- Slurred speech
- Weakness and loss of coordination
- Confusion
- Irrational behavior
- Uncontrollable shivering (although, at extremely low body temperatures, shivering may stop)
- Pale and cold skin
- Drowsiness – especially in more severe stages
- Slowed breathing or heart rate

Your body automatically begins to shiver to warm itself. As your energy is used up to keep warm, you may reach a point where your body will be unable to warm itself. If left untreated, your body will gradually shut down; and you can die.

● You can avoid hypothermia with the following precautions:

- Guard against dehydration.
- Avoid fatigue.
- Avoid cold winds.
- Take precautions, change out of wet clothes.
- Be aware of the symptoms and take action upon their onset.

● If you recognize hypothermia, take the following steps:

- Move the patient to shelter.
- Remove wet clothes and replace them with warm, dry garments.
- If the victim is alert, give them food and warm liquids to drink.
